

Our mission is to save 100 million lives from cardiovascular disease and to prevent epidemics.

Resolve to Save Lives partners with governments and civil society to implement scalable, proven strategies.

We are resolved to prevent millions of deaths from cardiovascular disease and prevent epidemics, with a focus on accelerating action through speed, simplicity, and scale in low- and middle-income countries.

Resolve works with more than 60 countries, and, in our first three years has helped protect millions of people from exposure to artificial trans fat, partnered with countries that are treating more than 2 million patients for hypertension, and supported more than 20 countries in Africa to improve epidemic preparedness and response.

Resolve to Save Lives is funded by Bloomberg Philanthropies, the Bill & Melinda Gates Foundation, Gates Philanthropy Partners, which is funded with support from the Chan Zuckerberg Foundation, Stavros Niarchos Foundation, CDC Foundation and the #StartSmall initiative. It is led by Dr. Tom Frieden, former director of the US Centers for Disease Control and Prevention.

Cardiovascular Disease

Cardiovascular disease kills more than 18 Million people every year.

Cardiovascular disease (CVD) is the world's leading cause of death, yet these deaths are largely preventable through simple, inexpensive yet underutilized actions.

We work to prevent CVD in low-income countries, where CVD disproportionately affects younger people.

Our Goals

Increase global control of blood pressure from 14% to 50%

Reduce global dietary sodium intake by 30%

Eliminate artificial trans-fats 0%

Prevent Epidemics

Most countries are inadequately prepared to find, stop, and prevent infectious disease outbreaks.

COVID-19 demonstrated that most countries are not adequately prepared to prevent, detect, and respond to disease threats. Because a disease outbreak anywhere is a threat everywhere, lack of preparedness is a threat to everyone.

Our Goals

National Legislation, Policy and Financing

Emergency Response Operations

National Laboratory Systems

Disease Surveillance

Emergency Preparedness

Human Resources

Emergency Health Communication
